PROFESSIONAL SUMMARY

Flutter Developer focused on building intuitive, reliable, and high-quality mobile applications. Strong foundation in application architecture, UI development, and modern development practices, with a problem-solving mindset and a focus on creating practical solutions that deliver a seamless user experience.

WORK EXPERIENCE

Flutter Developer Intern

Sep 2025 – Dec 2025

CPH4 · Gujranwala, Pakistan

- Developed cross-platform mobile applications using Flutter and Dart.
- Built and implemented responsive user interfaces based on application requirements.
- Worked with Flutter widgets, navigation, state management, API integration, and application architecture.
- Implemented core application functionality and integrated backend services where required.
- Debugged, tested, and resolved application issues to improve functionality and user experience.
- Developed two functional mobile applications as part of the internship, applying Flutter development practices in real-world projects.

PROJECTS

Office Task Manager (CPH4)

Tech Stack: Flutter | Dart | Firebase Auth | Cloud Firestore | Provider

- **Role-Based Workflows:** Developed distinct Admin (Task Assignment & Management) and Employee (Task Execution & Progress Tracking) dashboards.
- **Task Delegation:** Enabled admins to create, schedule, and assign tasks with due dates to specific team members.
- **Real-Time Synchronization:** Used Cloud Firestore to deliver instant live updates for task completions and status replies.
- **State Management:** Applied the Provider pattern (AuthProvider, TaskProvider) for clean business logic and state architecture.
- **Secure Authentication:** Integrated Firebase Auth for user registration, login, and access authorization.

FixNear – On-Demand Service App

Tech Stack: Flutter, Dart, Provider

- **App Architecture:** Built a cross-platform Flutter app connecting customers with local repair providers using clean architecture & Provider state management.
- **Map & Tracking:** Integrated OpenStreetMap (flutter_map) for real-time location-based provider discovery and job tracking.
- **Dual Workflows:** Developed distinct customer (request & rate) and provider (accept & manage jobs) portals.
- **APIs & Storage:** Implemented REST API integration (http), image uploads, and session persistence (shared_preferences).

StockSnap — Mobile Inventory & POS App

Tech Stack: Flutter, Dart, SQLite, Provider

- **Built an offline-first inventory & POS app** using Flutter and SQLite with real-time barcode scanning and automated POS checkout.
- **Engineered a restock forecasting engine** calculating sales velocity and stockout timelines to trigger automated reorder alerts.

- Implemented interactive fl_chart analytics dashboards and automated PDF/CSV report generation for sales and profit tracking.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Android Development

Backend & APIs: Firebase, REST APIs

Database: Firebase Firestore, SQLite

Development Tools: Git, GitHub, Android Studio, VS Code

Programming: Object-Oriented Programming, Data Structures & Algorithms

Development Practices: UI/UX Implementation, API Integration, Debugging, Version Control

EDUCATION

BS Computer Science

2022 – 2026

University of Central Punjab
